Neenah, WI 54956
Dear Ms. Hogan :

APR, the Association of Plastic Recyclers, is pleased to recognize Amcor's AmSky™ Recycle-Ready Blister Packaging System for the packaging of oral solid medications and dietary supplements as meeting or exceeding the most strict APR FPE-CG-01 Critical Guidance Protocol for PE Film and Flexible Packaging criteria. This APR recognition is based on the technical recyclability of the blister packaging innovation, in the polyethylene film recycling stream.

A Review Committee, appointed per the APR Recognition Operating Procedures, reviewed your data submission and concluded the data were correctly obtained by a qualified laboratory and were completely presented to show the blister packs submitted meet or exceed the most challenging test conditions and strictest APR Critical Guidance criteria.

The PE Film Critical Guidance documents that were used to evaluate the label innovations, are the product of a multi-industry consensus process to identify and address certain key technical considerations related to the recycling of postconsumer PE films. The Documents direct innovators to conduct specific testing per established testing procedures and then provide the innovator with guidance to interpret the results. The protocols are intended to help improve the quality of the recycled PE film stream by aiding innovators to make informed decisions about the consequences of packaging innovations. APR thanks Amcor, for voluntarily submitting this blister package for Recognition. The impact of these protocols is beneficial to world-wide recycling efforts. Meeting the Critical Guidance Document is a truly significant step in demonstrating overall recyclability of your blister packaging innovation.

Our recognition applies only to the AmSky™ Recycle-Ready Blister Packaging System for the packaging of oral solid medications and dietary supplements. While this Recognition speaks to the compatibility of your blister packaging, with PE film recycling, it does not speak to collection of blister packages or include other blister packages in the market that may conflict with the PE film recycling process. We encourage Amcor to be sure in its packaging information that the public does not misunderstand that this Recognition applies to look-alike blister packages or to believe collection is happening when it is not.

Yours truly,

President and CEO
