Washington, DC 20036

April 6, 2023

Mr. Wu Tingxiao,
Deputy General Manager
Henan Yinjinda New Materials Co., Ltd (China)
Industrial Park of Tangzhuang , Weihui Xinxiang Henan , China 453100

Dear Tingxiao:

The Association of Plastic Recyclers (APR) is pleased to recognize Yinjinda's C-PET shrink film substrate, as meeting or exceeding the most strict APR Critical Guidance criteria PET-CG-02, Critical Guidance Protocol for Clear PET Articles with Labels and Closures. This APR recognition is based on the technical recyclability of the label substrate innovation with the PET container recycling stream.

A Review Committee, appointed per the APR Recognition Operating Procedures, reviewed your data submission and concluded the data were correctly obtained by a qualified laboratory and were completely presented to show the films submitted meet or exceed the most challenging test conditions and strictest APR Critical Guidance criteria.

The Critical Guidance documents that were used to evaluate the shrink film innovation, are the product of a multi-industry consensus process to identify and address certain key technical considerations related to the recycling of postconsumer PET containers. The Documents direct innovators to conduct specific testing per established testing procedures and then provide the innovator with guidance to interpret the results. The protocols are intended to help improve the quality of the recycled PET container stream by aiding innovators to make informed decisions about the consequences of packaging innovations. APR thanks Henan Yinjinda New Materials Co. for voluntarily submitting this shrink film substrate for Recognition. The impact of these protocols is beneficial to world-wide recycling efforts. Meeting the Critical Guidance Document is a truly significant step in demonstrating overall recyclability of your shrink film innovation.

APR recognition applies only to the Yinjinda's C-PET shrinkable film substrate . While this Recognition speaks to the compatibility of your innovation shrink film, with PET container recycling, it does not speak to collection of containers with other shrink sleeves in the market that may conflict with the PET container recycling process. We encourage Yinjinda to be sure in its packaging information that the public does not misunderstand that this Recognition applies to look-alike shrink films or to believe collection is happening when it is not.

Yours truly,
