Mr. Armin Arminak
1350 Mountain View Circle
Azusa, CA 91702
Dear Mr. Arminak:

APR, the Association of Plastic Recyclers, is pleased to recognize APackaging Group's Infinity Trigger Sprayer as meeting or exceeding the most strict APR PET-CG-01 Critical Guidance Protocol for Clear PET Resin and Molded Articles. This APR recognition is based on the technical recyclability of the trigger sprayer in the PET bottle stream.

A Review Committee, appointed per the APR Recognition Operating Procedures, reviewed your data submission and concluded the data were correctly obtained by a qualified laboratory and were completely presented to show the tubes submitted meet or exceed the most challenging test conditions and strictest APR Critical Guidance criteria.

The PET Critical Guidance that was used to evaluate the APackaging Group's Infinity Trigger Sprayer, are the product of a multi-industry consensus process to identify and address certain key technical considerations related to the recycling of postconsumer PET bottles. The Documents direct innovators to conduct specific testing per established testing procedures and then provide the innovator with guidance to interpret the results. The protocols are intended to help improve the quality of the recycled bottle stream by aiding innovators to make informed decisions about the consequences of packaging innovations. APR thanks APackaging Group, for voluntarily submitting this trigger sprayer for Recognition. The impact of these protocols is beneficial to world-wide recycling efforts. Meeting the Critical Guidance Document guidelines is a truly significant step in demonstrating overall recyclability of your trigger sprayer.

Our recognition applies only to the APackaging Group's Infinity Trigger Sprayer. While this Recognition speaks to the compatibility of your trigger sprayer with PET bottle recycling, it does not speak to collection of used bottles with trigger sprayers or include other trigger sprayers in the market that may conflict with the PET bottle recycling process. We encourage APackaging Group to be sure in its packaging information that the public does not misunderstand that this Recognition applies to look-alike trigger sprayers or to believe collection is happening when it is not.

Yours truly,

President and CEO
