Ms. Sally Gong
Jiangsu Shuangxing Color Plastic New Materials Co., Ltd
No.1 Jingtou street,
Suqian City,
Jiangsu,P.R.China 223800

Dear Ms. Gong:

APR, the Association of Plastic Recyclers, is pleased to recognize Jiangsu's un-printed shrink sleeve PET films produced with recycled PET resins, as meeting or exceeding the strictest APR PET Critical Guidance criteria as per PET-CG-02 Critical Guidance Protocol for Clear PET Articles with Labels and Closures. This APR recognition is based on the technical recyclability of the label innovation with PET bottles.

A Review Committee, appointed per the APR Recognition Operating Procedures, reviewed your data submission and concluded the data were correctly obtained by a qualified laboratory and were completely presented to show the labels submitted meet or exceed the most challenging test conditions and strictest APR Critical Guidance criteria.

The PET Critical Guidance documents that were used to evaluate the un-printed shrink sleeve PET films produced with recycled PET resins, are the product of a multi-industry consensus process to identify and address certain key technical considerations related to the recycling of postconsumer PET bottles. The Documents direct innovators to conduct specific testing per established testing procedures and then provide the innovator with guidance to interpret the results. The protocols are intended to help improve the quality of the recycled bottle stream by aiding innovators to make informed decisions about the consequences of packaging innovations. APR thanks Jiangsu Shuangxing Color Plastic New Materials Co., Ltd, for voluntarily submitting their shrink film for Recognition. The impact of these protocols is beneficial to world-wide recycling efforts. Meeting the Critical Guidance Document is a truly significant step in demonstrating overall recyclability of your label.

Our recognition applies only to the un-printed shrink sleeve PET films produced with recycled PET resins. While this Recognition speaks to the compatibility of your shrink film with PET bottle recycling, it does not speak to collection of PET bottles with shrink films. We encourage Jiangsu Shuangxing Color Plastic New Materials Co., Ltd to be sure in its packaging information that the public does not misunderstand that this Recognition applies to look-alike shrink films or to believe collection is happening when it is not.

Yours truly,

President and CEO
