Ms. Kim Hensley
Mactac North America
4560 Darrow Road
Stow, Oh 44224

Dear Ms. Hensley:

APR, the Association of Plastic Recyclers, is pleased to recognize Mactac North America and Spinnaker 2.6 mil white top-coated BOPP pressure sensitive label substrate and 2.0 mil clear top-coated BOPP pressure sensitive label substrate, both with PUREfloat™ emulsion acrylic adhesive, as meeting or exceeding APR’s PET-CG-02, Critical Guidance Protocol for Clear PET Articles with Labels and Closures, most strict requirements and hereby so states. This APR recognition is based on the technical recyclability of the label substrate innovation with PET bottles.

A Review Committee, appointed per the APR Recognition Operating Procedures, reviewed your July 14, 2020 data submission and concluded the data were correctly obtained by a qualified laboratory and were completely presented to show the label substrate submitted meets or exceeds all critical guidance.

The Critical Guidance Protocol for Clear PET Articles with Labels and Closures is the product of multi-industry consensus of key issues related to the recycling of postconsumer PET bottles. The Protocol directs innovators to conduct specific testing per established testing procedures and then provides the innovator with guidance to interpret the results. The APR recognition is based on the innovation meeting or exceeding the most challenging test conditions and strictest guidance criteria.

APR thanks Mactac North America for its cooperation in using this important protocol. The protocol is intended to improve the quality of recycled bottles by helping innovators to make informed decisions about the consequences of PET bottle innovations. The impact of this protocol is worldwide.

Our recognition applies only to the pressure sensitive label substrate with PUREfloat™ emulsion acrylic adhesive and not necessarily to bottles using the labels as those bottles would need to be tested themselves to demonstrate the system of resin, adjuvants, and closure conformed to the APR Critical Guidance Document. Meeting the Critical Guidance Document guidelines is a truly significant step in demonstrating overall recyclability of your label product.

Yours truly,

APR President
