Mr. Craig Bushman  
Multi-Color Corporation  
4053 Clough Woods Drive  
Batavia, OH 45103-2586

Dear Mr. Bushman:

APR, the Association of Plastic Recyclers, is pleased to recognize Multi-Color Corporation's Roll-On Shrink-On (ROSO) label with MCC Colorfast™ Inks as meeting or exceeding APR's PET-CG-02, *Critical Guidance Protocol for Clear PET Articles with Labels and Closures*, most strict requirements and hereby so states. This APR recognition is based on the technical recyclability of the decorated label innovation with PET bottles. Any adhesive used is not part of this innovation.

A Review Committee, appointed per the APR Recognition Operating Procedures, reviewed your August 12, 2020 data submission and concluded the data were correctly obtained by a qualified laboratory and were completely presented to show the label substrate submitted meets or exceeds all critical guidance.

The *Critical Guidance Protocol for Clear PET Articles with Labels and Closures* is the product of multi-industry consensus of key issues related to the recycling of postconsumer PET bottles. The Protocol directs innovators to conduct specific testing per established testing procedures and then provides the innovator with guidance to interpret the results. The APR recognition is based on the innovation meeting or exceeding the most challenging test conditions and strictest guidance criteria.

APR thanks Multi-Color Corporation for its cooperation in using this important protocol. The protocol is intended to improve the quality of recycled bottles by helping innovators to make informed decisions about the consequences of PET bottle innovations. The impact of this protocol is world-wide.

Our recognition applies only to decorated sleeve labels and not necessarily to bottles using the labels as those bottles would need to be tested themselves to demonstrate the system of resin, adjuvants, and closure conformed to the APR Critical Guidance Document. As the adhesive used for the ROSO label is not supplied by Multi-Color Corporation, this recognition does not include any specific adhesive. Users of the Multi-Color ROSO label are reminded to use a non-interfering adhesive. Meeting the Critical Guidance Document guidelines is a truly significant step in demonstrating overall recyclability of your label product.

Yours truly,

APR President
