Dr. Frank Embs
Director of New Business Development
Auriga Polymers Inc.
One Lake Point Plaza Building, Suite 450
4235 South Stream Blvd
Charlotte NC 28217

Dear Dr. Embs:

APR, the Association of Postconsumer Plastic Recyclers, is pleased to recognize Auriga Polymers' PolyClear® EBM PET 5506, as meeting or exceeding the APR PET Critical Guidance Document protocol and hereby so states.

A Review Committee, appointed per the APR Recognition Operating Procedures, reviewed your May 30, 2014 data submission and concluded the data were correctly obtained by a qualified laboratory and completely presented to show Auriga Polymers' PolyClear® EBM PET 5506 resin meets or exceeds all critical guidance.

The PET Critical Guidance Document is the product of multi-industry consensus of key issues related to the recycling of postconsumer PET bottles. The Document directs innovators to conduct specific testing per established testing procedures and then provides the innovator with guidance to interpret the results. The APR recognition is based on the innovation meeting or exceeding the most challenging test conditions and strictest guidance criteria.

APR thanks Auriga Polymers for its cooperation in using this important protocol. The protocol is intended to improve the quality of recycled bottles by helping innovators to make informed decisions about the consequences of PET bottle innovations. The impact of this protocol is beneficial to world-wide recycling efforts.

Our recognition applies to Auriga Polymers' PolyClear® EBM PET 5506 resin and the bottle body made from the neat resin. Commercial bottles with possible additions to the resin and labels and closures would need to be tested themselves to demonstrate the complete package conforms to the APR Critical Guidance Document for APR recognition to apply to a commercial bottle. Meeting the Critical Guidance Document guidelines is a truly significant step in demonstrating overall recyclability of your resin.

Yours truly,

Stephen Alexander
Executive Director, Association of Postconsumer Plastic Recyclers
