Consulting and Laboratory Companies with Experience Conducting/Orchestrating APR Test Methods

The APR does not certify or otherwise approve laboratories to perform APR test methods. However, the following companies have requested to be identified and have demonstrated their capacity to perform the tests within the category shown. It is essential that the laboratory performing APR tests have the equipment necessary, be familiar with the test and have experience performing the test. This list is not meant to be a complete list of all testing labs capable of conducting APR tests. Any laboratories that wish to be considered as candidate testing labs should contact APR for more information.
